I turn LLMs and coding agents into software people use. Go and TypeScript, from the service to the interface, with guardrails so the agents stay honest.

EXPERIENCE

Applied AI Engineer, Agentero

Apr 2026 — Present

US network that gives independent insurance agents carrier access and the software to run an agency. Spain-based.

- Infrastructure on Google Cloud, backend in Go, and the marketplace frontend in Next.js.
- Marketplace feature work and critical internal tools, including public guardrails so a coding agent cannot commit or push until the checks pass.

Freelance product engineer, RecheDev

2025 — Present

Design and build, from the first meeting to production.

- ClipHub for SocialPro, as their software consultant: a Windows app that turns a CS2 demo into an edited video. 100+ users.
- Berrus (2025 — present): Discord notifications, faster SQL, and an Electron desktop client.
- Piroboom: a Next.js storefront for a fireworks shop in Elche.

SELECTED WORK

- **ClipHub** — Go pipeline, Next.js studio, Electron shell. Built for SocialPro as their software consultant. 100+ users.
- **Honey Encryption Proxy** — local proxy that hides proprietary names before they reach an LLM API.
- **Gravity Room** — live strength tracker. React, Expo, Elysia, Postgres. gravityroom.app
- **riskforge** — portfolio project. Insurance quote gateway in Go, Terraform for Cloud Run, Spanner and Pub/Sub.

EDUCATION

- Higher technical diploma in web application development (DAW) — 2024–2026
- Harvard CS50, Introduction to Computer Science — 2024
- University of Helsinki, Java Programming MOOC — 2024
- Anthropic, Claude Code in Action — 2026
