I turn LLMs and coding agents into software people use. I use AI to accelerate the work and keep a human in the loop. I ship the product, from the service to the interface, and the guardrails that keep the agents honest.

EXPERIENCE

Applied AI Engineer, Agentero

Apr 2026 to present

US network that gives independent insurance agents carrier access and the software to run an agency. Spain-based.

- Infrastructure on Google Cloud, backend services in Go, and the marketplace interface in Next.js.
- End-to-end ownership of marketplace features and critical internal tooling.

Freelance software engineer, SocialPro

2025 to present

Gaming and esports creator agency. Freelance work on their website and for their clients.

- socialpro.es: design and build of the agency website, a brand portal and the first internal CRM.
- Piroboom: the website of a fireworks shop in Elche, from the first sketch to production. An 82 MB PDF catalogue became a searchable web reader.

Freelance product engineer, RecheDev

2021 to present

Freelance since 2021: first PC optimisation for competitive gaming, now design and build from the first meeting to production.

- ClipHub for SocialPro, as their software consultant: a Windows app that turns a CS2 demo into an edited video. 100+ users.
- Berrus, a browser role-playing game: Discord notifications, faster SQL, and an Electron desktop client.
